### Faculty Development

#### Old Business:

1. Ophthalmology time in the curriculum Dr. F. Schiavone
2. Fourth year Selectives

#### New Business:

- 1.

Here is the enrollment for Lab Medicine and Clinical Therapeutics for 05-06, 06-07 and 07-08.

Clinical Therapeutics	Lab medicine	Academic Year
32	18	2005-2006
29	11	2006-2007
30	11	2007-2008

In 05-06 and 06-07 Lab Medicine was offered in February. Next year, it's offered in November.

Clinical Therapeutics has always been in April.

Students frequently move around depending on when they're going to Costa Rica and other international sites. February and April are popular travel months since we ask the students to be here for the March Match week. The November date is a test to see if students will want another Fall option. We also needed a Fall didactic because we had a bunch of students who decided late in this past Fall to go away for spring semester and complete medical school in the Fall. They weren't going into ER so they couldn't take the July didactic.
